- UI/UX Design
- HTML & CSS
- JavaScript
- React.js
- Version Control (Git & GitHub)

Soft Skills

- Fast learner and adaptable
- Strong problem-solving skills
- Clear and professional communicator
- Reliable and responsible
- Eager to improve and learn

CAREER OBJECIVES

A tech-driven individual with a passion for transforming problems into practical digital solutions. I aim to contribute fresh, user-focused innovation in software and web development, while continuously evolving my skills in a fast-pased, future ready IT environment. Ready to turn lines of code into real world impact.

WORK EXPERIENCE

CTU-AC SUPPLY MONITORING SYSTEM
September 2023- January 2024

As a Front-End Developer for the CTU-AC Supply Monitoring System, I design intuitive and engaging web interfaces, focusing on creating seamless digital experiences using modern technologies like HTML, CSS, JavaScript while ensuring performance optimization, accessibility, and collaboration with back-end teams to deliver an optimized and user-friendly system.

AUTOMATED COOPERATIVE SYSTEM
March 2024- Present

I contributed to the Automated Cooperative System project as a front-end developer, using HTML, CSS, JavaScript, and React.js to design responsive, user-friendly interfaces. I worked closely with a cross-functional team to align with project goals, ensuring cross-browser compatibility, accessibility, and performance best practices. Through this experience, I enhanced my skills in creating interactive web components and optimizing UI for various devices. I also gained valuable collaboration experience by working alongside designers, back-end developers, and project managers.

SEMINAR ATTENDED
2024

- Cybersecurity
- Pre- Employment Advocacies
